High-End Software & Security Engineering

AdNovum is a premier Swiss IT company specializing in demanding IT projects. We offer our customers a full set of tailored IT services ranging from IT architecture and security consulting to the design, implementation and maintenance of customized business and security solutions. Our offering also includes tailored support services and the products of the NEVIS Security Suite. NEVIS is the Swiss market leader in identity and access management and is deployed by renowned finance, insurance and other companies as well as government offices.

AdNovum was founded in 1988. Today, at our headquarters in Zurich and our offices in Bern, Lausanne, Budapest, Ho Chi Minh City and Singapore, over 550 IT consultants, software engineers, application managers and other IT staff build and maintain IT solutions for customers throughout the world.

Industry-leading Solutions

AdNovum has been developing and integrating mission-critical enterprise applications and solutions for over 25 years. Our solutions seamlessly integrate with existing system landscapes and can easily be extended to include new services and technologies. This protects prior investments and enables our customers to rapidly adjust their offering to changing business needs. This is evidenced by a whole series of industry-leading mobile payment, fintech, and e-government solutions.

As a full-service technology partner, we support customers in bringing live promising business ideas. To enable rapid, yet secure implementation, we combine tried-and-tested products with tailored custom developments and new technologies to create an advanced user experience.
