

Solutions for Skype for Business environments

Challenges of Skype 4 Business

Most companies are investing massively in Unified Communications and Skype for business is the main alternative. But talking about « unified » may sound weird when you still have PSTN, ISDN, videoconferencing systems, meeting rooms, etc...

The challenge today is to simplify the use of Skype for Business across the entire company. That's where Nevicom can help, our deep knowledge of room integration, videoconferencing management and streaming/recording will help you to simplify the use of Skype for Business in your company.

Make the most of your Skype for Business investment...

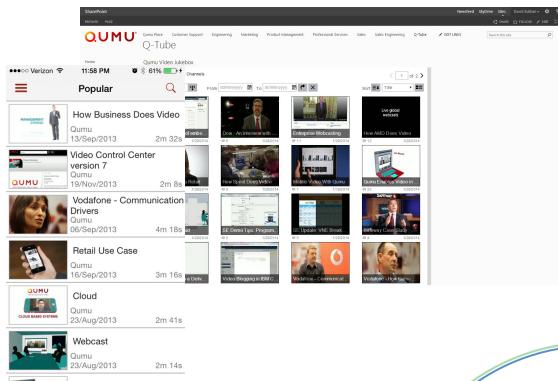

One communication tool for all

You have chosen your UC solution simply because it's the best one on the market... but when it comes to integrate it into meeting rooms, auditoriums, manage the usage or keep your legacy investments compatible with it... there's where trouble may appear.

Our mission, use your unified communication Skype for Business tool everywhere, without hassle, without engineering knowledge and make it compatible with anyone/anything. Today Nevicom can help you :

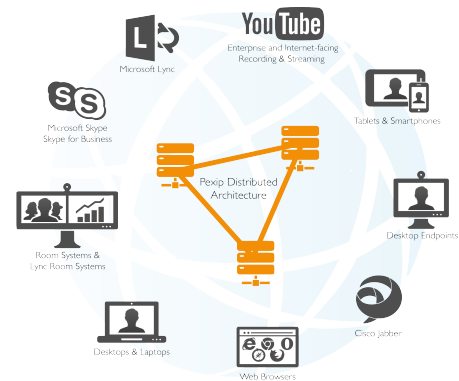

- Integrate Skype 4B in meeting rooms
- Integrate Skype 4B in auditoriums
- Allow full compatibility with H323 or standard SIP in transparent mode
- Stream and webcast from Skype 4B
- Live monitoring calls and gather usage information/statistics
