

What is Netwrix Auditor?

Netwrix Auditor is a visibility platform for **user behavior analysis** and risk mitigation that enables control over changes, configurations and access in **hybrid IT environments** to protect data regardless of its location. The platform provides **security analytics** to detect anomalies in user behavior and investigate **threat patterns** before a data breach occurs.

Netwrix Auditor includes applications for Active Directory, Azure AD, Exchange, Office 365, Windows file servers, EMC storage devices, NetApp filer appliances, SharePoint, Oracle Database, SQL Server, VMware and Windows Server. Empowered with a **RESTful API** and **user activity video recording**, the platform delivers visibility and control across all of your on-premises or cloud-based IT systems in a unified way.

What Netwrix Auditor does?

Detect Data Security Threats – On Premises and in the Cloud

Netwrix Auditor bridges the visibility gap by delivering security analytics about critical changes, configurations and data access in hybrid IT environments and enabling investigation of suspicious user behavior. The platform also provides alerts about patterns that violate corporate security policies and indicate a possible insider threat.

Pass Compliance Audits with Less Effort and Expense

Netwrix Auditor provides the evidence required to prove that your organisation's IT security program adheres to GDPR, PCI DSS, ISO/IEC 27001, HIPAA, SOX, GLBA, FISMA/NIST800-53, FERPA, CJIS, NERC CIP and other standards. It also ensures easy access to compliance reports for more than 10 years.

Increase the Productivity of Security and Operations Teams

With Netwrix Auditor, there's no need to crawl through weeks of log data to answer questions about who changed what, when and where a change was made, or who has access to what. The platform delivers actionable audit data to anyone in your organisation who needs it.
